FOREWORD

The publications of the Mineral Policy Sector fall under the following six classifications: (1) Mineral Bulletins (MR Series), (2) Mineral Maps, (3) Mineral Reports, (4) Mineral Resource Internal Reports (MRI Series), (5) Miscellaneous Publications, and (6) Special Reports.

Mineral Bulletins. Studies of current interest on mineral resources, mineral economics, mineral legislation, mineral taxation and other related topics are published in this series. Also included are reprints of papers and articles presented or published elsewhere.

Note: The publication series known as **Operators Lists** has been discontinued. It is replaced by the publications entitled "Mining and Mineral Processing Operations in Canada" and "Metallurgical Works in Canada" which are published in the Mineral Bulletin series.

Mineral Maps. Special maps, either associated with or independent of any report, depict mineral resources, production, transportation, export, import or utilization of one or more minerals of importance to the Canadian economy. Map bases used may be of Canada, North America, the Western Hemisphere or the world.

Mineral Reports. Reports on the same area of subjects covered by the Mineral Bulletins but given a comprehensive and exhaustive treatment for use as reference documents. The Canadian Minerals Yearbook is included in this series.

AVANT-PROPOS

Les publications du Secteur de la politique minérale se retrouvent parmi les six classifications suivantes: (1) les bulletins minéraux (série MR), (2) les cartes minières, (3) les rapports minéraux, (4) les rapports internes sur les ressources minérales (série MRI), (5) les publications diverses et (6) les rapports spéciaux.

Bulletins minéraux. Études d'actualité qui traitent surtout des ressources minérales, de l'économie des minéraux, de la législation et de la fiscalité relatives aux minéraux, et d'autres sujets connexes y sont publiés. Ils comprennent également des réimpressions de documents et d'articles présentés ou publiés ailleurs.

Nota: La série **Liste des exploitants** a été interrompue pour faire place à deux autres publications ayant pour titre "Mines et usines de traitement des minéraux au Canada" et "L'activité métallurgique au Canada", lesquelles font partie de la série des bulletins minéraux.

Cartes minières. Cartes indépendantes, associées ou non à un rapport, décrivent les ressources minérales, la production, le transport, l'exportation, l'importation ou l'utilisation d'un ou de plusieurs minéraux qui sont importants pour l'économie canadienne. Les fonds de cartes utilisés peuvent être ceux du Canada, de l'Amérique du Nord, de l'hémisphère occidental ou du monde.

Rapports minéraux. Ces rapports portent sur des sujets semblables à ceux traités par les bulletins minéraux, mais ils sont plus approfondis et plus détaillés. Ils sont destinés à servir de documents de référence. L'Annuaire des minéraux du Canada fait partie de cette série.

The Canadian Minerals Yearbook is a comprehensive record of the growth and development of the mineral industry in Canada. It reviews developments in the production, trade and consumption of some 55 mineral commodities in Canada in the year named. Similar annuals in this series date back to 1886, thus forming an invaluable historical record of one of the world's most diversified mineral industries.

Mineral Resource Internal Reports. During 1980, the Mineral Policy Sector modified its series of internal reports (identified by the prefix MRI). These internal studies and analytical works cover a wide variety of subjects that were not published in one of our regular series of publication, but may be of interest to our readers.

Miscellaneous Publications. This category includes pamphlets, folders, papers, addresses, booklets, etc. published for a variety of purposes.

Special Reports. Major studies of the Mineral Policy Sector are published and made available to our readers as special reports.

The Mineral Policy Sector also publishes a periodical entitled "Canadian Mineral Industry Monthly Report". This publication presents a general review of the more important current developments in the Canadian mineral industry. To obtain this publication contact the Publications Distribution Office listed on page 57.

L'Annuaire des minéraux du Canada est un registre officiel de l'industrie minérale et de son évolution. Il expose les faits nouveaux survenus dans la production, le commerce et la consommation de quelque 55 produits minéraux au Canada pour l'année en cause. La publication annuelle de cet ouvrage remonte à 1886. L'ensemble constitue donc un dossier historique de l'une des industries minérales les plus diversifiées au monde.

Rapports internes sur les ressources minérales. En 1980, le Secteur de la politique minérale a modifié sa série de rapports internes (identifiés par l'abréviation MRI). Les études internes et les travaux analytiques que renferment les rapports et qui traitent d'une grande variété de sujets n'ont pas été publiés dans une de nos séries régulières, mais elles peuvent soulever l'intérêt de nos lecteurs.

Publications diverses. Cette catégorie comprend des brochures, des discours, des dépliants, etc. qui peuvent servir à plusieurs usages.

Rapports spéciaux. Des études importantes, effectuées par le Secteur de la politique minérale, sont mises à la disposition de nos lecteurs sous forme de rapports spéciaux.

Le Secteur de la politique minérale publie également un périodique intitulé: "L'industrie minérale du Canada - Rapport mensuel". Cette publication donne un aperçu général des faits nouveaux survenus dans l'industrie minérale. Des exemplaires sont disponibles en s'adressant au Bureau de distribution des publications dont l'adresse figure à la page 57 du présent répertoire.

HOW TO ORDER

Mineral Bulletins, Maps and Mineral Reports can be purchased from Canadian Government Publishing Centre, Supply and Services Canada, Ottawa, Canada, K1A 0S9. All publication orders must be prepaid. Cheque or money order should be made payable to the Receiver General of Canada. An additional 20 per cent is added to the price of publications mailed to other countries.

Internal Reports (MRIs), miscellaneous publications and special reports can be ordered as indicated in the instructions at the beginning of each section.

GUIDE DE L'ACHETEUR

Les cartes, les bulletins et les rapports minéraux sont en vente au Centre d'édition du gouvernement du Canada, Approvisionnements et Services Canada, Ottawa, Canada, K1A 0S9. Toutes les commandes de publications doivent être payées à l'avance. Le chèque ou le mandat-poste doit être établi à l'ordre du Receveur général du Canada. Des frais supplémentaires de 20 % sont exigés pour les publications expédiées dans d'autres pays.

Les rapports internes (MRI) et les publications diverses ainsi que les rapports spéciaux peuvent être commandés comme il est mentionné au début de chaque section.
